

The best European  
Master's Degree in  
Microelectronic  
Design

**Enrique Hostalet**  
AMS-OSRAM

---

Graduated in Telecommunications Engineering with a specialisation in electronics in 2014. During 2014 I wrote my master's thesis at ams focusing on Time to Digital converters (Frequency Sigma Delta Modulators).

In 2015 I moved to Belgium and started working at nSition as an analogue designer and layouter, where I gained experience in HV circuits, power management (bandgaps, operation, LDOs), among others. Subsequently, in 2019, I joined ams-OSRAM, where I work as a Staff Analogue Design Engineer. Currently, I have the role of technical lead and analogue designer in an applied photon counting project for axial tomography detectors.
