Design

Jose Manuel García
AMS-OSRAM

Graduated in Physics and obtained a PhD from the Universidad de Sevilla in 2001 and 2009 respectively.

In June 2001 he started his doctoral studies at the IMSE-CNM with a research grant. From September 2004 until March 2009 he worked as senior analogue designer at Micronas GmbH (Freiburg i. B., Germany) and from 2009 to 2012 at Trident Microsystems; developing products for TV reception and video signal processing. In 2012, he joined ams-OSRAM where he has developed ASICs, consumer products and currently works as Senior Principal designer on medical imaging products. He is co-inventor of more than 10 patents and has been published in conferences and international journals.
